1. Security Functional Requirements (SFRs)				
CLASS	FAMILY	COMPONENT [2]	ELEMENTS/OPERATIONS/NOTES [2]	
FAU Security audit [DTI]	ARP	Security audit automatic response	1 Security alarms  1 act	
	GEN	Security audit data generation	1 Audit data generation 2 User identity association  1 level, evt, 2 inf 1	
	SAA	Security audit analysis	1 Potential violation analysis 2 Profile based anomaly detection 3 Simple attack heuristics - 4 Complex attack heuristics  1 2 evt, rules 1 profile, 2, 3 con 1 violation-evt, 2 activity-inf, 3 1 penetration-evt, indicator-evt, 2 inf, 3	
	SAR	Security audit review	1 Audit review 2 Restricted audit review 3 Selectable audit review  1 usr, inf, 2 1 1 methods, criteria	
	SEL	Security audit event selection	1 Selective audit  1 att, att	
	STG	Security audit event storage	1 Protected audit trail storage - 2 Guarantees of audit data availability 3 Action in case of possible audit data loss - 4 Prevention of audit data loss  1 2 ability 1 2 ability, 3 metric, con 1 act, lim 1 act, act	
FCO Communication [DTI]	NRO	Non-repudiation of origin	1 Selective proof of origin  - 2 Enforced proof of origin  1 inf-type, role(3rdParty), 2 att, inf-fields, 3 role(3rdParty), lim 1 inf-type, 2 att, inf-fields, 3 role(3rdParty), lim	
	NRR	Non-repudiation of receipt	1 Selective proof of receipt  - 2 Enforced proof of receipt  1 inf-type, role(3rdParty), 2 att, inf-fields, 3 role(3rdParty), lim 1 inf-type, 2 att, inf-fields, 3 role(3rdParty), lim	
FCS Crypto graphic support [DTI]	CKM	Cryptographic key management	1 Cryptographic key generation 2 Cryptographic key distribution 3 Cryptographic key access 4 Cryptographic key destruction  1 algor., keysize, standard 1 keysize, standard 1 type, method, standard 1 method, standard	
	COP	Cryptographic opr.	1 Cryptographic operation  1 opr, algor., keysize, standard	
FDP User Data Protection [DTI]	ACC	Access control policy	1 Subset access control - 2 Complete access control  1 pol, sub/obj/opr 1 pol, sub/obj/opr, 2	
	ACF	Access control functions	1 Access attribute based access control  1 pol, sub/obj/att, 2 gov.-rules, 3 auth.-rules, 4 deny-rules	
	DAU	Data authentication	1 Basic Data Authentication 2 Data Authentication with Identity of Guarantor  1 obj/inf-types, 2 sub 1 obj/inf-types, 2 sub	
	ETC	Export from the TOE	1 Export of user data without security att 2 Export of user data with security attributes  1 pol, 2 1 pol, 2, 3, 4 rules	
	IFC	Information flow control policy	1 Subset information flow control - 2 Complete information flow control  1 pol, sub/inf/opr 1 sub/inf, 2	
	IFF	Information flow control functions	1 Simple security attributes  - 2 Hierarchical security attributes  3 Limited illicit information flows - 4 Partial elimination of illicit information flows 5 No illicit information flows 6 Illicit information flow monitoring  1 sub/inf/att, 2 flow-rule, 3 add.-rule, 4 auth-rules, 5 deny-rules 1 sub/inf/att, 2 opr-relations, 3 rules, 4 auth-rules, 5 deny-rules, 6 1 flow-types, capacity 1 pol, flow-types, capacity, 2 flow-types 1 pol-name 1 pol, flow-types, capacity	
			3 Limited illicit information flows - 4 Partial elimination of illicit information flows 5 No illicit information flows 6 Illicit information flow monitoring  1 sub/inf/att, 2 flow-rule, 3 add.-rule, 4 auth-rules, 5 deny-rules 1 sub/inf/att, 2 opr-relations, 3 rules, 4 auth-rules, 5 deny-rules, 6 1 flow-types, capacity 1 pol, flow-types, capacity, 2 flow-types 1 pol-name 1 pol, flow-types, capacity	
	ITC	Import from outside of the TOE	1 Import of user data without security att. 2 Import of user data with security attributes  1 pol, 2, 3 rules 1 pol, 2, 3, 4, 5 rules	
	ITT	Internal TOE transfer	1 Basic internal transfer protection - 2 Transmission separation by attribute 3 Integrity monitoring - 4 Attribute-based integrity monitoring  1 pol, evt 1 access- pol, evt, 2 att 1 pol, err, 2 act 1 pol, err, att, 2 act	
	RIP	Residual information protection	1 Subset residual information protection - 2 Full residual information protection  1 act, obj 2 act	
	ROL	Rollback	1 Basic rollback - 2 Advanced rollback  1 pol, opr, 2 lim 1 pol, opr, 2 lim	
	SDI	Stored data integrity	1 Stored data integrity monitoring - 2 Stored data integrity monitoring and action  1 err, att 1 err, att, 2 act	
	UCT	Inter-TSF user data confidentiality transfer protection	1 Basic data exchange confidentiality  1 pol, act	
	UIT	Inter-TSF user data integrity transfer protection	1 Data exchange integrity 2 Source data exchange recovery - 3 Destination data exchange recovery  1 pol, act, act 2 act 1 pol, err 1 pol, err	
FIA Identification and authentication [DTI]	AFL	Authentication failures	1 Authentication failure handling  1 num/range, evt, 2 evt, act	
	ATD	User att. definition	1 User attribute definition  1 att	
	SOS	Specification of secrets	1 Verification of secrets 2 TSF Generation of secrets  1 metric 1 metric, 2 fct	
	UAU	User authentication	1 Timing of authentication - 2 User authentication before any action 3 Unforgeable authentication 4 Single-use authentication mechanisms 5 Multiple authentication mechanisms 6 Re-authenticating 7 Protected authentication feedback  1 act, 2 1 1 act, 2 act 1 mechanism 1 mechanism, 2 rules 1 con 1 feedback	
			1 Timing of authentication - 2 User authentication before any action 3 Unforgeable authentication 4 Single-use authentication mechanisms 5 Multiple authentication mechanisms 6 Re-authenticating 7 Protected authentication feedback  1 act, 2 1 1 act, 2 act 1 mechanism 1 mechanism, 2 rules 1 con 1 feedback	
	UID	User identification	1 Timing of identification - 2 User identification before any action  1 act, 2 1	
	USB	User-subject binding	1 User-subject binding  1 att, 2 association-rules, 3 change-rules	

**Conventions:** [DT] Dependency table; “-“ hierarchical component; SFR element operation colours ([selection](#), [assignment](#)).

**Abbreviations:** act (action), att (attribute), con (condition), err (error), evt (event), inf (information), lim (limitation), num (number), obj (object), opr (operation), pol (policy), sub (subject), u/s (user/subject).

CLASS	FAMILY	COMPONENT [2]	ELEMENTS/OPERATIONS/NOTES [2]
FMT Security management [DTI]	MOF	Management of functions in TSF	<u>1</u> Management of security functions behaviour <u>1 act, fct, roles</u>
	MSA	Management of security attributes	<u>1</u> Management of security attributes <u>2</u> Secure security attributes <u>3</u> Static attribute initialisation <u>4</u> Security attribute value inheritance <u>1 pol, act(opr), att, role</u> <u>1 att</u> <u>1 pol, act(opr), 2 role</u> <u>1 value-setting-rules</u>
	MTD	Management of TSF data	<u>1</u> Management of TSF data <u>2</u> Management of limits on TSF data <u>3</u> Secure TSF data <u>1 act(opr), data, roles</u> <u>1 data, roles, 2 act</u> <u>1 data</u>
	REV	Revocation	<u>1</u> Revocation <u>1 att, groups(resources), roles, 2 rules</u>
	SAE	Security attribute expiration	<u>1</u> Time-limited authorisation <u>1 att, roles, 2 act</u>
	SMF	Specification of Management fct.	<u>1</u> Specification of Management Functions <u>1 fct</u>
	SMR	Security management roles	<u>1</u> Security roles <u>- 2</u> Restrictions on security roles <u>3</u> Assuming roles <u>1 roles, 2</u> <u>1 roles, 2, 3 con</u> <u>1 roles</u>
FPR Privacy [DTI]	ANO	Anonymity	<u>1</u> Anonymity <u>- 2</u> Anonymity without soliciting information <u>1 u/s, sub opr obj</u> <u>1 u/s, sub opr obj, 2 service, sub</u>
	PSE	Pseudonymity	<u>1</u> Pseudonymity <u>- 2</u> Reversible pseudonymity <u>- 3</u> Alias pseudonymity <u>1 u/s, sub opr obj, 2 num, sub, 3 opr, metric</u> <u>1 u/s, sub opr obj, 2 num, sub, 3 opr, metric,</u> <u>4 usr(resources), con</u> <u>1 u/s, sub opr obj, 2 num, sub, 3 opr, metric, 4 con</u>
	UNL	Unlinkability	<u>1</u> Unlinkability <u>1 u/s, opr, cause(relations)</u>
	UNO	Unobservability	<u>1</u> Unobservability <u>- 2</u> Allocation of information impacting unobservability <u>3</u> Unobservability without soliciting information <u>4</u> Authorised user observability <u>1 u/s, opr, obj, usr/sub</u> <u>1 inf, 2 con</u> <u>1 service, sub, inf</u> <u>1 usr, resource/service</u>
FPT Protection of the TOE [DTI]	FLS	Fail secure	<u>1</u> Failure with preservation of secure state <u>1 failure types</u>
	ITA	Availability of exported TSF data	<u>1</u> Inter-TSF availability within a defined availability metric <u>1 data-types, metric, con</u>
	ITC	Confidentiality of exported TSF data	<u>1</u> Inter-TSF confidentiality during transmission <u>1</u>
	ITI	Integrity of exported TSF data	<u>1</u> Inter-TSF detection of modification <u>- 2</u> Inter-TSF detection and correction of modification <u>1 metric, 2 act</u> <u>1 metric, 2 act, 3 mod-type</u>
	ITT	Internal TOE TSF data transfer	<u>1</u> Basic internal TSF data transfer protection <u>- 2</u> TSF data transfer separation <u>3</u> TSF data integrity monitoring <u>1 opr</u> <u>1 opr, 2</u> <u>1 evt(err), 2 act</u>
	PHP	TSF physical protection	<u>1</u> Passive detection of physical attack <u>- 2</u> Notification of physical attack <u>3</u> Resistance to physical attack <u>1, 2</u> <u>1, 2, 3 device/element, usr/role</u> <u>1 scenarios, device/element</u>
	RCV	Trusted recovery	<u>1</u> Manual recovery <u>- 2</u> Automated recovery <u>- 3</u> Automated recovery without undue loss <u>4</u> Function recovery <u>1 failures</u> <u>1 failures, 2 failures</u> <u>1 failures, 2 failures, 3 quantification, 4</u> <u>1 fct/scenarios</u>
	RPL	Replay detection	<u>1</u> Replay detection <u>1 entities, 2 act</u>
	SSP	State synchrony protocol	<u>1</u> Simple trusted acknowledgement <u>- 2</u> Mutual trusted acknowledgement <u>1</u> <u>1, 2</u>
	STM	Time stamps	<u>1</u> Reliable time stamps <u>1</u>
	TDC	Inter-TSF TSF data consistency	<u>1</u> Inter-TSF basic TSF data consistency <u>1 data-types, 2 rules</u>
	TEE	Testing of external entities	<u>1</u> Testing of external entities <u>1 evt(con), properties 2 act</u>
	TRC	Internal TOE TSF data replication consistency	<u>1</u> Internal TSF consistency <u>1, 2 fct</u>
	TST	TSF self test	<u>1</u> TSF testing <u>1 evt(con), TSF(parts), 2 TSF-data(parts), 3 TSF(parts)</u>
FRU Resource Utilisation [DTI]	FLT	Fault tolerance	<u>1</u> Degraded fault tolerance <u>- 2</u> Limited fault tolerance <u>1 TOE-capabilities, failure-types</u> <u>1 failure-types</u>
	PRS	Priority of service	<u>1</u> Limited priority of service <u>- 2</u> Full priority of service <u>1, 2 resources</u> <u>1, 2</u>
	RSA	Resource allocation	<u>1</u> Maximum quotas <u>- 2</u> Minimum and maximum quotas <u>1 resources, u/s, time</u> <u>1 resources, u/s, time, 2 resources, u/s, time</u>
FTA TOE access [DTI]	LSA	Limitation on scope of selectable attributes	<u>1</u> Limitation on scope of selectable attributes <u>1 session-att, att</u>
	MCS	Limitation on multiple concurrent sessions	<u>1</u> Basic limitation on multiple concurrent sessions <u>- 2</u> Per user attribute limitation on multiple concurrent sessions <u>1, 2 default-lim</u> <u>1 rules, 2 default-lim</u>
	SSL	Session locking	<u>1</u> TSF-initiated session locking <u>2</u> User-initiated locking <u>3</u> TSF-initiated termination <u>4</u> User-initiated termination <u>1 time-interval, 2 evt</u> <u>1, 2 evt</u> <u>1 time-interval</u> <u>1</u>
	TAB	TOE access banners	<u>1</u> Default TOE access banners <u>1</u>
	TAH	TOE access history	<u>1</u> TOE access history <u>1 succ-display, 2 unsucc-display, 3</u>
	TSE	TOE session establish.	<u>1</u> TOE session establishment <u>1 att</u>
FTP Trusted path/channel	ITC	Inter-TSF trusted channel	<u>1</u> Inter-TSF trusted channel <u>1, 2 TSF/product, 3 fct</u>
	TRP	Trusted path	<u>1</u> Trusted path <u>1 rem/local, evt(violation), 2 rem/local-usr,</u> <u>3 auth(service)</u>

**Conventions:** [DT] Dependency table; “-“ hierarchical component; SFR element operation colours ([selection](#), [assignment](#)).

**Abbreviations:** **act** (action), **att** (attribute), **con** (condition), **err** (error), **evt** (event), **inf** (information), **lim** (limitation), **num** (number), **obj** (object), **opr** (operation), **pol** (policy), **sub** (subject), **u/s** (user/subject).
